Dear Mr. Burrows:

Thank you very much for your letter of November 11, in which you indicated that you received our radio station.

The programming that you have listed as being ours , agrees with our logs and we are pleased to confirm that you did receive this radio station between 5:36 am EST , and 5:42 am EST , on NOV. 17, 1987.

This radio station was 60 years old on April 1 , 1986 . However we moved to 830 kHz at 5000 watts day , and 1000 watts night on September 19 , 1985 . We are particularly interested in the new DX reports that have been coming in . Thank you for yours .

Our frequency is 830 Kwatts on the AM band, at 5000 watts day and 1000 watts night with a Nautel Amphet 5 solid state transmitter. Daytime we are omnidirectional with 1 tower, with a tower height of 254 ft. At night we run skywave with a 3 tower array. We broadcast 24 hours a day 7 days a week,with a coverage area of about 80 Klm radius.

Our studios are located just north of the city of Brockville, with our transmitter sight located 5 miles north of the studios. We were affiliated with the CBC at one time, we are now owned by ST. Lawrance Broadcasting Co. of Kingston,Ont Canada.Our format is light adult contempary.

We receivea lot of DX letters and we enjoy getting them. the furthest report we got was from Norway.I hope this letter is of some help to you, and thank you once again for your letter.

Sincerly:

S.A.Radford
Engineering Technician
